

# **Cannabis *and* Medicine:** **A New Frontier in** **Therapeutics**

**Saturday, 14 February 2015**

**San Jose Convention Center, Room LL20D**

**3 PM - 4:30 PM**

The medical use of cannabis has become a global social, economic, political, and scientific phenomenon. Increasing numbers of jurisdictions worldwide are allowing access to herbal cannabis, and a range of policy initiatives are emerging to regulate its production, distribution, and authorization.

It is widely believed that there is little evidence to support the consideration of cannabis as a therapeutic agent. However, clinical research into the safety and efficacy of cannabinoids is gradually informing the debate.

Three accomplished international experts on cannabis and cannabinoids will share their perspectives on the therapeutic potential of medical cannabis and will explore the emerging science behind it.

# Cannabis and Medicine: A New Frontier in Therapeutics

MODERATOR: **Mark Ware**

## SPEAKERS

**Igor Grant**

*University of California, San Diego*

**The Psychiatric and  
Neurocognitive Effects  
of Cannabis**

**Roger Pertwee**

*University of Aberdeen, Scotland*

**The Pharmacology and  
Therapeutic Potential  
of Cannabinoids**

**Mark Ware**

*McGill University Health Centre,  
Canada*

**Efficacy and Safety of  
Cannabis and Cannabinoids  
in Treating Patients**

*This symposium was funded by the Montreal General Hospital Foundation  
of the McGill University Health Centre in Montreal, Canada.*
