Nom, Prénom:* REQUÊTE PANEL TUMEUR SOLIDE Date de naissance (AAAA-MM-JJ):* Laboratoire Central de Diagnostic Moléculaire Nom du père: OPTILAB-MUHC Génétique 1001 boul. Décarie, E05.5051, Montréal, QC, H4A 3J1 Nom de la mère: Courriel: molecular.pathology@muhc.mcgill.ca Dossier patient # (MRN):* Fax: 514-938-7405 Tel: 514-934-1934 x24900 / x62746 Médecin prescripteur:* RAMQ #:* Pour les bébés, SVP fournir le # de RAMQ de la mère Nom, Prénom:* Sexe:* Masculin Féminin Inconnu Permis #:* Institution:* Analyse demandée:* Addresse:* AmpliSeq Focus Panel (ADN et ARN) RNAseq ciblé Panel Cérébrale Ciblé (ADN seulement) Séquençage POLE Panel Tumeur BRCA (BRCA1/2) Couriel:* Analyse ciblée – Spécifier: Tel·* Fax.* (Fax pour envoi des résultats) Pourcentage de cellules & type tumoral:* Personne de contact: Pourcentage de cellules tumorales (PCT ≥ 10%):* % Tel: (pour RNAseq ciblé PCT ≥ 20% est requis) Je certifie avoir expliqué au patient/tuteur la nature, les bénéfices, risques et ☐ Cholangiocarcinome Cancer de l'ovaire limites des analyses demandées. J'autorise le laboratoire à télécopier les ☐ Cancer colorectal ☐ Cancer du sein résultats au numéro indiqué ci-haut. ☐ Tumeur stromale gastro-intestinal (GIST) ☐ Cancer de la prostate Adénocarcinome pulmonaire Cancer du pancréas Cancer de l'endomètre Date:* ☐ Sarcome Autre: Cancer de la thyroïde ☐ Carcinome urothélial ☐ Tumeur cérébrale (Type: Échantillon:* Liste de contrôle & envoi:* Tissu fixé (FFIP) (AmpliSeq Focus, Panel Cérébrale Ciblé): Liste de contrôle: Échantillons étiquetés avec au moins deux identifiants* 10 coupes de 5 μm dans un tube de 1,5 mL (minimum de 5 coupes) Formulaire de demande d'analyse complété (ce document)* ☐ 6 lames blanches de 5 µm d'épaisseur 1 lame H&E étiquetée avec au moins deux identifiants* Tissu fixé (FFIP) (Panel Tumeur BRCA, RNAseq ciblé, seq POLE) Copie du rapport de pathologie/cytologie* 10 coupes de 10 μm dans un tube de 1,5 mL *Informations requises. L'analyse ne sera pas effectuée si des 10 lames blanches de 10 μm d'épaisseur informations sont manguantes. Tissu congelé ou frais Instructions d'envoi: Date prélèvement – Heure:* - Les lames doivent être envoyées dans une boîte de transport adaptée. - Les échantillons FFIP (lames/coupes) et les tissus frais sur RNAlater Type de tissu – Spécifier:* peuvent être envoyés à température ambiante. - Les tissus congelés doivent être envoyés sur glace sèche. ≥ 30 mg de tissu frais sur RNAlater - Merci d'envoyer les échantillons et les documents associés à l'adresse en haut de cette page. Des blocs FFIP ne seront pas acceptés SVP fournir une lame H&E. Cette lame ne sera pas retournée. Entourer la région tumorale si le pourcentage de cellules tumorales Voir les informations ci-jointes concernant la préparation des échantillons et la description de l'analyse. (PCT) est faible. Réservé au laboratoire: Date - heure de réception:
