

## Notice to area residents and businesses

Montreal, December 6, 2010

### McGill University Health Centre's new Glen Campus

Dear Sir or Madam,

Please be advised that, exceptionally, on Sunday, December 12, 2010, between 8 a.m. and 5 p.m., Groupe immobilier santé McGill (GISM) will be installing foundation piles for Block E, the MUHC Research Institute wing. There will be no truck traffic to or from the site on that day.

#### Construction schedule reminder

The regular work schedule for the piles is Monday to Saturday 7 a.m. to 10 p.m., with some exceptions, until spring 2011. Excavation work will continue as planned for several more weeks, following the current schedule of Monday to Saturday, 7 a.m. to 5 p.m. Trucks required to transport the day's excavated soil will be running from Monday to Saturday between 5 p.m. and 10 p.m.

Note that the site will be closed from December 18, 2010 to January 2, 2011, inclusively.

#### Foundations

Of 5,300 piles, approximately 1,000 are already in place. Installing these piles is necessary to set a solid foundation for the building, given the soil characteristics. Foundation work (formwork and concreting) will continue throughout the winter, to be completed in August 2011.

Please be assured that we are aware of the inconveniences a construction site of this size can cause, and we will keep you informed of any changes that arise during the construction phase.

Thank you in advance for your cooperation.
